# GT<sup>X</sup><sup>3</sup> Drain Clenz Gel

**SAFE, EFFECTIVE AND MONEY SAVING  
TREATMENT FOR  
REMOVAL OF ORGANIC MATERIAL FROM  
ALL DRAIN LINES**

## **MONEY SAVING SUPERIOR RESULTS WITH THE POWER OF THREE**

The managing of sanitation problems associated with the organic material that accumulates in and on the drain, drain lines, cracks, crevices and other hard to reach places is constant issue for restaurants, hotels, hospitals, schools and many other food preparation facilities. These problems include the development of fly infestations, noxious odors and slow drains that often back-up. This problem is corrected by removing the organic material.

There are a number of products that will claim to be able to do this effectively, such as ordinary drain cleaners, hot water, detergents, bleach or ammonia but *they just don't work*. The absolute safest and most effective solution is the use of a highly concentrated all natural product with specifically selected chemistry to create clean odor free drain lines.

**GT<sup>X</sup><sup>3</sup> Drain Clenz Gel** is such a product. **GT<sup>X</sup><sup>3</sup> Drain Clenz Gel** is a highly concentrated gel which clings to the sides of drains, pipes or whichever area it is applied. It is easily applied into cracks, crevices and other hard to access non-drain sites. **GT<sup>X</sup><sup>3</sup> Drain Clenz Gel** incorporates our unique, versatile, advanced chemistry for superior cleaning of Fats, Oil and Grease (F.O.G.) immediately upon application and continues to work in the pipes and grease trap. The effective formulation promotes greatly improved performance in the cleaning and removal of organic materials causing the problems.

**GT<sup>X</sup><sup>3</sup> Drain Clenz Gel** is Bio-Degradable, Non-Toxic, and Non-Caustic.

**GT<sup>X</sup><sup>3</sup> Drain Clenz Gel** greatly improves drain flow safely and effectively and **REMOVES NOXIOUS ODORS** and prohibits **DRAIN FLY INFESTATIONS**.

## **GT<sup>X</sup><sup>3</sup> Drain Clenz Gel WORKS!!**

**Application:** Weekly, add one ounce  
**GT<sup>X</sup><sup>3</sup> Drain Clenz Gel** to every  
drain. **IT'S THAT SIMPLE!!**
