PX-700®

THE CUTTING EDGE OF TECHNOLOGY  
THE ORIGINAL BIO-STIMULANT

SOLIDS REDUCTION • GREASE REDUCTION • ODOR ELIMINATION

Wastewater

Lakes & Ponds

Agriculture

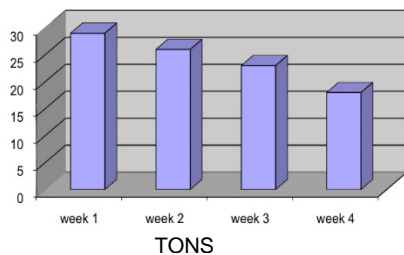

Industrial

PX-700 is a biocatalyst liquid that dramatically stimulates and increases the metabolic and reproductive rates of endogenous bacteria. PX-700 provides an environmentally sound and personnel SAFE treatment for wastewater facilities. The introduction of PX-700 initiates a more complete breakdown of organic solids and odors without the use of cultured microorganisms or toxic chemicals.

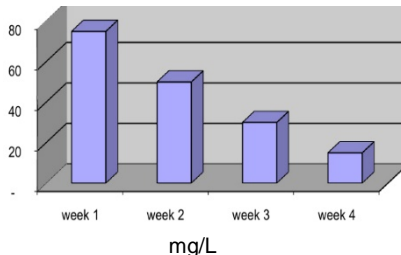

Introduce PX-700 into your facility for these BENEFITS:

- Biosolids Reduction
- Decreased Hauling Costs
- Decreased Use of Polymer/Flocculent
- Decreased Environmental Concerns
- Decreased Electrical Costs
- Total Suspended Solids Reduction in Effluent
- Decreased Recovery Time After Upset
- Delay or Eliminate the Need for Future Capital Investment
- Reduced Labor Costs
- Improved Plant Performance
- Decrease in Odors Associated with Plant Operations

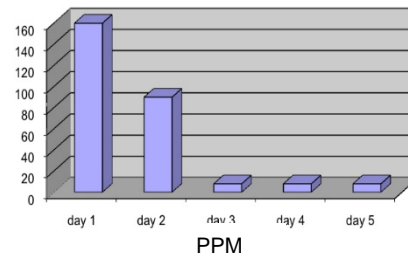

BIOSOLIDS REDUCTION  
Reduce solids disposal costs  
20% to 60%

GREASE REDUCTION  
Less foaming  
Improves settling

H<sub>2</sub>S ODOR REDUCTION  
Without bulk Chemicals
