# Triple Punch

**SAFE & EFFECTIVE LIFT STATION DEGREASER  
WITH THE POWER OF CITRUS SCENT DEODORANT**

**Triple Punch** was developed by demand of customers requiring a safe non-toxic biodegradable degreaser with a natural citrus scent deodorant.

**Triple Punch** is revolutionary natural dispersant that breaks organic and hydrocarbons to a minute particle that indigenous organisms can remediate. Our revolutionary dispersant breaks particles and changes polarity that absolutely prohibits the solidification of fats, oils and grease (F.O.G.) downstream.

**Triple Punch** cleans fats, oils, and grease from wastewater lift stations, sewer lines, and facilities with a maximum strength of a non-toxic cleaner/dispersant. **Triple Punch** also contains orange scent that utilities rely on to decrease wastewater odors during warmer spring and summer months.

**Triple Punch** citrus additive does not use di-limeonene, which has become too costly for utilities to implement.

Use **Triple Punch** where grease is a problem:

- Sewer Lines
- Lift Stations
- Drain Lines
- Equipment
- Floors

#### Benefits of **Triple Punch**:

- Fast Acting
- Environmentally Safe
- Non-toxic
- Reduces Fats, Oils & Grease (F.O.G.)
- Biodegradable
- Controls Odors
- Cost Effective

**Knock-Out ODORS • SOLIDS • F.O.G. with the PUNCH!**
